

## Day5 Assignment

### 1- Instructor Form

The screenshot shows a web form for adding an instructor. It includes input fields for name, age, and salary, a department dropdown, an 'add Employee' button, a 'Sort' dropdown, and a 'Filter' dropdown. Below the form is a table with columns: Name, Department, Age, Salary, and Remove. The table contains two rows of data: 'eman' in 'SD' department with age 20 and salary 1000, and 'ali' in 'OS' department with age 35 and salary 558. Each row has a 'Delete' button.

Name	Department	Age	Salary	Remove
eman	SD	20	1000	Delete
ali	OS	35	558	Delete

Create Adding Instructor Data Form taking

Name, age, salary and department

1- Adding validation to the following (Adding process will not complete without validation)

a- Name should be string and not empty

The screenshot shows the 'name' input field with a red error message 'name is required' next to it.

b- age should be number between 25:60

The screenshot shows the 'age' input field with the value '200' and a red error message 'age should be from 25:60' next to it.

c- salary should be number

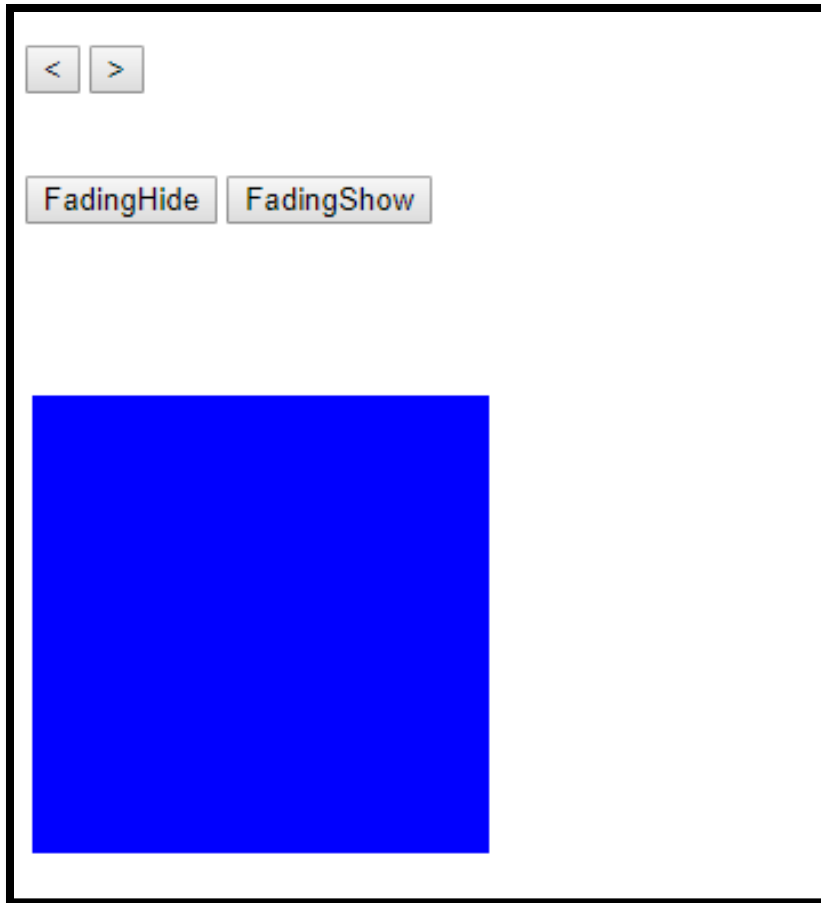

NOTE: all fields should be validated to complete add operation.

2- delete button to delete selected instructor

3- Sort drop down List will sort instructors according to name or department

4- Filter drop down List will filter instructors greater than 50 and less than or equal 50

### 2- Moving div element left and right

### 3- Course List

<ul style="list-style-type: none"><li>• JS</li><li>• JQuery</li><li>• Angular</li><li>• HTML</li></ul>	<ul style="list-style-type: none"><li>• CSS</li></ul>
